When you [Save & Submit] your application:
- You will not be able to amend the application.
- The system will assign a reference number for your application with the format HREC-yyyy/nnnn.
- An email will be sent to you advising you of the reference number.
- An email will be sent to any Secondary Investigator(s) to update their profile where applicable.

- when all Secondary Investigators have updated their profiles, the Principal Investigator will be s1087395ent an email that the application has been routed to the SRC Administrator to commence the review process.

9. Submitting extra information

   9.1. Introduction

   At different stages of the application review process, you may be requested to provide extra information or elaborate on information already provided. At each stage, an email will be sent to the Principal Investigator specifying what extra information is required. The email will contain the link to login to the system and also details of when the next SRC and/or HREC meeting is scheduled. The extra information must be uploaded or corrected within 3 months of the request, failing which the application will be closed and you will be required to restart the entire submission process if you wish to continue with the application.

   9.2. Submitting extra information

   After you've clicked on the link in the email and logged into the system, follow the steps below to submit extra information.
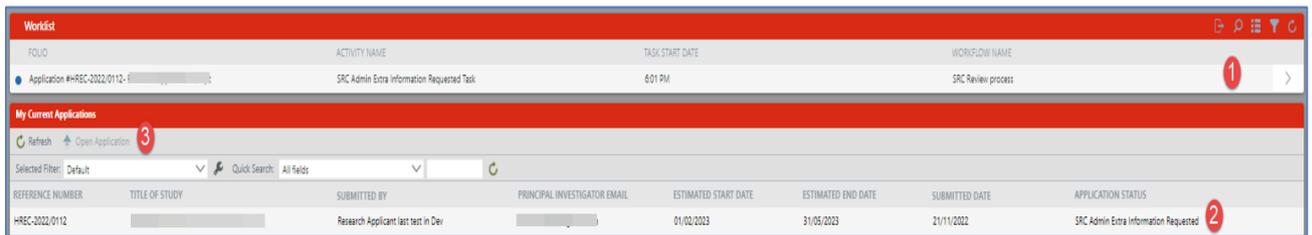

Step	System/field	Your input
①	Worklist task	Click on the arrow on the right to open the application and submit the extra information or correct the information already provided.
②	My Current Application – Application status	Note the status of the application. In this example, the SRC Administrator requested extra information.
③	My Current Application – Open Application	Another way to provide the extra information is to click once on the reference number and then click on Open Application or double click on the reference number.

The application will be opened, defaulting to Section 1.

Scroll down to the bottom of screen to a section titled **Rework instructions.** Here you find the sections and questions that you are required to provide the extra information or correct the information already provided. In this example, the Principal Investigator is required to elaborate on question S4-3.
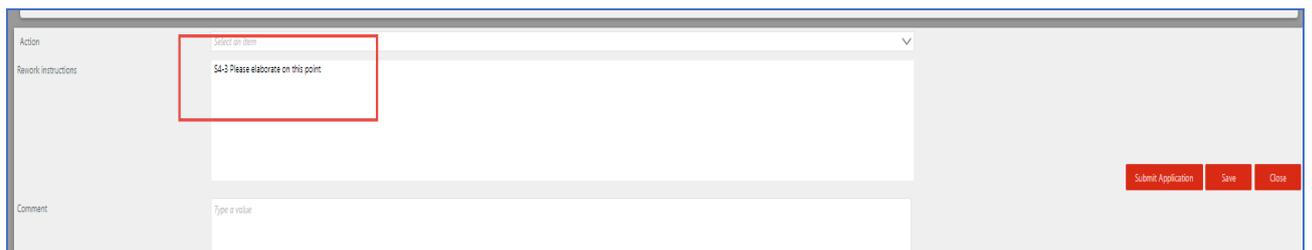

Go to the relevant question. You will note a tick next to the question.

This is also an indicator that you are required to provide extra information for this question. Only the questions with the tick will be editable. All other questions will be locked for editing. This is to ensure that other questions that were already reviewed and found to be in order are not changed when extra information is requested.

At this point, you may edit the question as requested. If the request is for an uploaded document to be replaced with a corrected version, click on the uploaded document once, and then click on the delete icon on the extreme right of that field. You may then upload a new version (PDF version only).

Below is an example of the edited question.
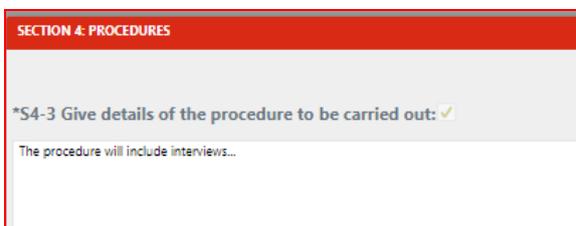

You may add an optional comment at the bottom of the screen under the Comment section.

Once you have updated the extra information for all flagged questions and added your comment, click on the Action dropdown list and select **Submit amended information**, then click on [Submit Application]. You may choose to [Save] the application and return to it at a later time or [Close] to abort the changes.

The system will return you to the Principal Investigator dashboard. If you refresh the screen (press F5 on the keyboard), you will note the status of the application change, in this example where the SRC Administrator has requested the extra information, to SRC Admin Review. In this example the SRC Administrator will need to review the extra information provided.

An email will be sent to the Principal Investigator confirming that the extra information has been submitted.

In this example, should the SRC Administrator accept the extra information, the application will be accepted and automatically moved to the next stage in the process. If the reviewer is not satisfied with the extra information, the process outlined in this section will be repeated until there is acceptance.

9.3. Requesters of extra information
The following reviewers may request extra information:
9.3.1. SRC Administrator after reviewing the application for SRC administrative correctness
9.3.2. SRC Committee after they meet to discuss the application for Scientific merit/soundness
9.3.3. HREC Administrator after reviewing the application for HREC administrative correctness
9.3.4. HREC Committee after they meet to discuss the application for Ethical merit/soundness

The procedure outlined in **9.2 Submitting extra information** applies to all requests for extra information.

 Although there may be a number of requesters of extra information, the email you receive will only be sent by the SRC Administrator or HREC Administrator.

10. Digitally signing the PI Declaration form

One of the mandatory requirements when submitting a research application is for a declaration form to be completed by the Principal Investigator and his or her Head of Department. This form must be signed after the SRC Administrator is satisfied that all administrative requirements are met and that the protocol can be routed to the SRC Committee Members for review.

10.1. Signing of the Declaration form

On approval of the protocol by the SRC Administrator, the system will generate the declaration form. The form will then be added to a digital signature software named Adobe Sign. Both the Principal Investigator and Head of Department must consecutively sign the form electronically and submit it in the Adobe Sign software. On receipt of the fully signed form, the SRC Administrator will upload the signed form to the system. This will trigger the application to be routed to the SRC Review Members to review the application.

Note that you do not need Adobe Sign to be loaded onto your computer. On receipt of the email, click on Review and Sign, click on start (flagged in yellow on the left of your screen), add your signature and any other requested information and click on submit at the bottom of the screen. Do not print the form and sign it manually, as the signature has to be an electronic one. For a short tutorial on signing a document using Adobe Sign, click on this YouTube link https://www.youtube.com/watch?v=wLS1vuvBqN0

Adobe Sign will keep you apprised of the status of the signing process as well as send each signing party and the SRC Administrator a copy of the fully signed document.

11. Submitted applications

On the Principal Investigator Landing Page in section **6**, click on ❻ *Submitted Applications*.

Submitted applications are applications that you have submitted for review. These applications cannot be edited unless you are requested to do so by unless requested to do so by the SRC or HREC Administrators.

Below is an example of applications submitted. Take note of the different statuses of each application. These statuses indicate to you exactly where in the review process each application is.

12. Saved Applications

On the Principal Investigator Landing Page in section **6**, click on ❹ *Saved Applications*.

Saved applications are applications still in draft and can be edited at any time until it is submitted for review. Thereafter, no changes can be made unless requested to do so by the SRC or HREC Administrators. No reference number is assigned to draft applications.

Step	System/field	Your input
❶	Edit application	Click once the draft application that you want to edit, then click on Edit Application or double click on the entry. Follow the steps in section **8 Creating and submitting an application** to submit the application for review.
❷	Delete application	Click once on the draft application, then click on **Delete application.** Click [OK] to delete or [Cancel] to abort the deletion.
❸	Submit	Click on **Submit** to continue.

13. Approved or declined applications

Only the SRC and HREC Committee may approve or decline your application following a meeting of committee members.

On approval of the application by the HREC Committee, an email with a Clearance Certificate will be sent by the HREC Administrator. No certificate is sent after the SRC approves the application.

Should your application be declined for whatever reason by either the SRC or HREC Committee, you will be sent an email outlining the details of why the application was declined. You may choose to rework your application and resubmit (starting from scratch) or abort the process.

14. Progress reports

There is currently no functionality built into the system for you to electronically submit your progress report. However, the progress report may be sent to the HREC Administrator (HRECAdmin@sanbs.org.za)

Progress reports are to be submitted annually until the research is completed. For applications whose duration is less than a year, the progress report must be sent as soon as the research is concluded.

15. Getting help

For all application and system related queries, please send an email to SRCAdmin@sanbs.org.za.
